THe use of this Table is this, If thou wouldst know what the Interest of 100. and 5 pounds is for 9 months, at 6 per Cent. then in the first column find out 100 at the foot of the column, and right against it under the title 9 mon. (which is the fifth colum) there you shall find 4 l. 10 s. and against the number 5 l. you shall find 4 s. 6 d. so that the Interest of 105 l. for 9 mon. cometh to 4 l. 14 s. 6 d. the same of all the rest.

This moneth ſet, cut, and lay Quickſets and Roſes, as all other Plants. Set and plant Vines; Hops, and all fruit that grows on Buſhes. Sow Peaſe, Beans, and Onions; furniſh your Gardens with Sallads and Pot-herbs for Summer. Prune and trim all ſorts of Fruit-trees from Moſs, Canker, & ſuperfluous Branches. Remove Grafts or yong Trees, in the laſt quarter, the Moon being in *Aries*, *Libra*, or *Scorpio*.

If neceſſity urge, you may let Blood, but be ſparing in Phyſick, and be ſure when a warm day comes, to prevent taking of cold, through careleſneſs; for the warm air this moneth is not laſting, but oft deceives us to your prejudice.

This Moneth ſow Hemp and Flax, Pole Hops, ſet and ſow all kindes of Garden Herbs. Reſtore the liberty of the laborious Bee, by opening her Hive. Bark Trees for Tanners; and let good Huſwives minde their Gardens, and begin to think of their Daries.

In Gardning never this rule forget,
To ſow dry, and ſet wet.

The uſe of Phyſick becomes now ſeaſonable, as alſo Purging and Blood-letting. It is good to abſtain from Wine; for many diſeaſes will be taken thereby, to the ruine of many.

This Moneth commands the provident Housewife, and the prudent Artist, to set their Stills on work. In the beginning of the moneth sow and set those tender Summer Herbs that would not endure the former cold. Weed your Hop-Gardens, cut off superfluous Branches, Moss Trees and Gardens, and weed Corn.

Now every Garden and Hedg affords thee Food and Physick. Rise early, walk the Fields by sunning streams, the North and West sides. Sage and Sweet-butter, an excellent breakfast. Clarified Whay with Sage, Scurvy-Grass Ale and Wormwood Beer, are wholesome Drinks. Green Whay excellent against Choler.

At the Full of the Moon, this Moneth and next, gather your Herbs to keep dry for the whole year. Set Rosemary and Gilliflowers, sow Lettice and Radish three or four days after the Full, and they will not run to Seed. Shear your Sheep the Moon increasing.

Let honest moderate Labor and Exercise procure your Sweat. Thin and light Diet, and chaste Thoughts, tend to health. Lie not unadvisedly on the Ground, or overhastily drink.

Get Rue, Wormwood, and Gall, to strew on your Flores to destroy Fleas. At the Full Moon gather Flowers and Seeds, dry your Flowers rather in the shade, than in the Sun; which too much exhaleth their vertue, but to avoid corruption, let the Suns heat a little visit them.

Beware of violent heat, and sudden cold, which are the great distempers of this moneth, and produce pestilential diseases: Forbear superfluous drinking, but eat heartily.

Now with thankfulness reap your desired Harvest. Sow Winter Herbs in the New of the Moon. Esteem fair weather as precious, and mispend it not. Gather Garden Seeds near the Full. Use moderate diet, forbear to sleep presently after meat. Take heed of sudden cold after heat.

Beware of Physick and Bloodletting in the Dog-days, if the Air be hot; otherwise, if occasion require, you may safely make use thereof.

An Excellent Balsom giving present ease to such that are troubled with the Gout, Sciatica, all Aches, Cramps, Strayns, Swellings and Bruises, Sinews benum'd, comforts wonderfully, though of long continuance before. The beginning of this Moneth, and the end of the former, gather Hops, their complexion being brown, and the weather fair and no dew on the ground. Kill Bees, make Verjuice, remove and set all slips of Flowers, between the two Lady days; remove Trees from *September* till *February*, especially in the new of the Moon: The weather warm, and the Wind South or West, cut Quicksets, gather ripe Fruit. Sow Wheat and Rie, Winter Parsnips and Carrots; and set Roses, Strawberries and Barberries.

Now as the year declines, provide your Winter Garments, hang them on loosly, to prevent that you might after repent of: Good for Physick and Phlebotomy.

Sow Wheat and Rie, remove young Plants and Trees about the New Moon, observing this as a seasonable Secret, that in serting, you carefully place that side to the South and West, which were so before you took up the plant; otherwise the cold kills it. Gather your remaining Winter fruit, set all kindes of Nuts and Acorns, and cut Rose-trees but once in two years, if you intend to have store of Roses.

The Garments you last month hung on your backs in jest, now Button them close in good earnest; Cloath you now for prevention, for the Cold comes insensibly, and Fogs ofttimes beget a whole Winters cold. Consult with your Tailors, as well as Physicians.

In the last quarter of the Moon this moneth and the next, are the best times to fell Timber: Let Fowlers minde their Game. Cover all your best Flowers and Herbs from cold and storms, with rotten Horse-dung: Look well to thy Cattle, Blood Horses. Let a warm fire, and a cup of *Nectar* be thy Bath; the Kitchin thy Apothecaries shop, Hot meats and broths thy Physick, and a well spred Table the proof of thy Charity to thy poor Neighbors, to whom this advice is seasonable;

If thou be poor, and canst not feast at all,
Thank God for such as thee to feasting call.

The best Physick is as before, a merry honest heart, and the exercise of Charity among thy poor Neighbors.

A Description of the Four Quarters of the Year.

THe Spring begins this year *March* 10, 3 quarters past 5 in the morning, at which time the Sun enter the Equinoctial Sign *Aries*, causing an equality of day and night, all the Habitable World over.

Summer takes beginning the 11th of *June*, half an hour after 8 in the morning; the Sun then approaching the Tropical Nothern Solstice, makes longest days, and shortest nights on this side the Æquator.

Autumn or Harvest Quarter begins, the Sun entring the first scruple of *Libra*, which is this year *September* 12, a quarter before midnight, again equalizing day and night.

Winter begins *December* 11. half an hour before high noon, the Sun then entring the Tropical sign *Capricorn*, formeth the shortest day, and longest night in the year, to all on this side the Æquator.

The Eclipses happening this present Year, 1666.

FOur Eclipses will be visible to the world this revolution, two of the Sun, and two of the Moon, whereof onely the first of the Sun will be visibly seen to us in England.

The first is of the Moon on Wednesday June 6, at almost half an hour past 7 at night; this will be visible to the Eastern world, and not quite ended when the Moon rises, if the sky be cleer it may be discerned.

The second Eclipse is of the Sun, on Friday the 22 of June, early in the morning, the beginning will be half an hour after 5 in the morning; the middle about a quarter after 6, the end near half an hour after 7; above half the Suns body will be darkened; it portends death, and bad weather, some eminent persons die.

The third Eclipse is of the Moon, the first of December, and will be seen to our Antipodes, and the Phillipine and Moluccas Islands, after our two a clock in the afternoon.

The last Eclipse is of the Sun the 15 of December, and will be visible onely in the Southern tract of the Earth, as Magellanica, and other places to us unknown.

The use of this Table, with a Caution.

Do but observe in the fifth Column of the Almanack the hours and minutes of full-Sea at London bridge over against each several day of the Moneth, to or from which time there noted, add or substract such hours and minutes as this Table above doth appoint, and the total of the one, or remainder of the other shall be the time of the full-Sea at any of these places aboveſaid, salved the Anticipation or protraction of time, which by the winds, Land floods, or Moons latitude may be caused, which may be an hour, or sometimes more or less error, according to their site and quantity, a thing very remarkable of sea-men when they pass by any Sands, over any barr or haven, or such like.
